Microsoft talking open source at #ATO2015. I don't think Microsoft means what you think it means any more...

proprietary software. I have changed.

Microsoft is committed to Linux and open source

Linux is a real business for Microsoft

25% of IaaS VMs
in Azure are Linux

System Center
manages hundreds
of thousands of
Linux/UNIX servers

Many enterprises
and service providers
run Linux as a guest
on Hyper-V

... and we're been in a long open source journey!

System Center has
managed Linux and
UNIX servers since 2009

Linux drivers for Hyper-V
available since 2010

Azure IaaS has run
Linux VMs since
"day 1" in 2013

Today

Linux and open source are a fundamental
part of how we do business
